---

Dear our valued customers

We would like to inform all customers that even though we will not use the "SACHS Bikes" brand from now on until the matters between both parties are settled, we still are willingly able to give full service to all customers since all the units were made here in Thailand and we can produce and supply all the parts continuously.

We are going to develop new motorcycles with the same distinctive direction and with more advanced engineering such as the fully adjustable up-side-down front fork, improved rear shock absorber, improved rear wheel with proper cushion rubber, and very significantly, the EFI engine. We also offer special version with YOSHIMURA exhaust system. All of the new motorcycles will be under "TIGER" brand with cooperation with several world-famous motorcycles engineering experts from Japan and Europe.

To sell motorcycles in Thailand, lots of effort and engineering skill are required to meet the Thai very strict emission standard. To assure the usage in Thailand also require very durable test ride. All of our motorcycles had gone through these processes. Thailand is a free country and finally the customers will have the final decision.

Thank you very much.

TIGER MOTOR CO., LTD
